GENPACT TEARDOWN

A Business Process Management (BPM) Case Study

Presented By:
Prashant Sharma (2022IMG-048)
Sushant (2022IMG-062)

COMPANY OVERVIEW

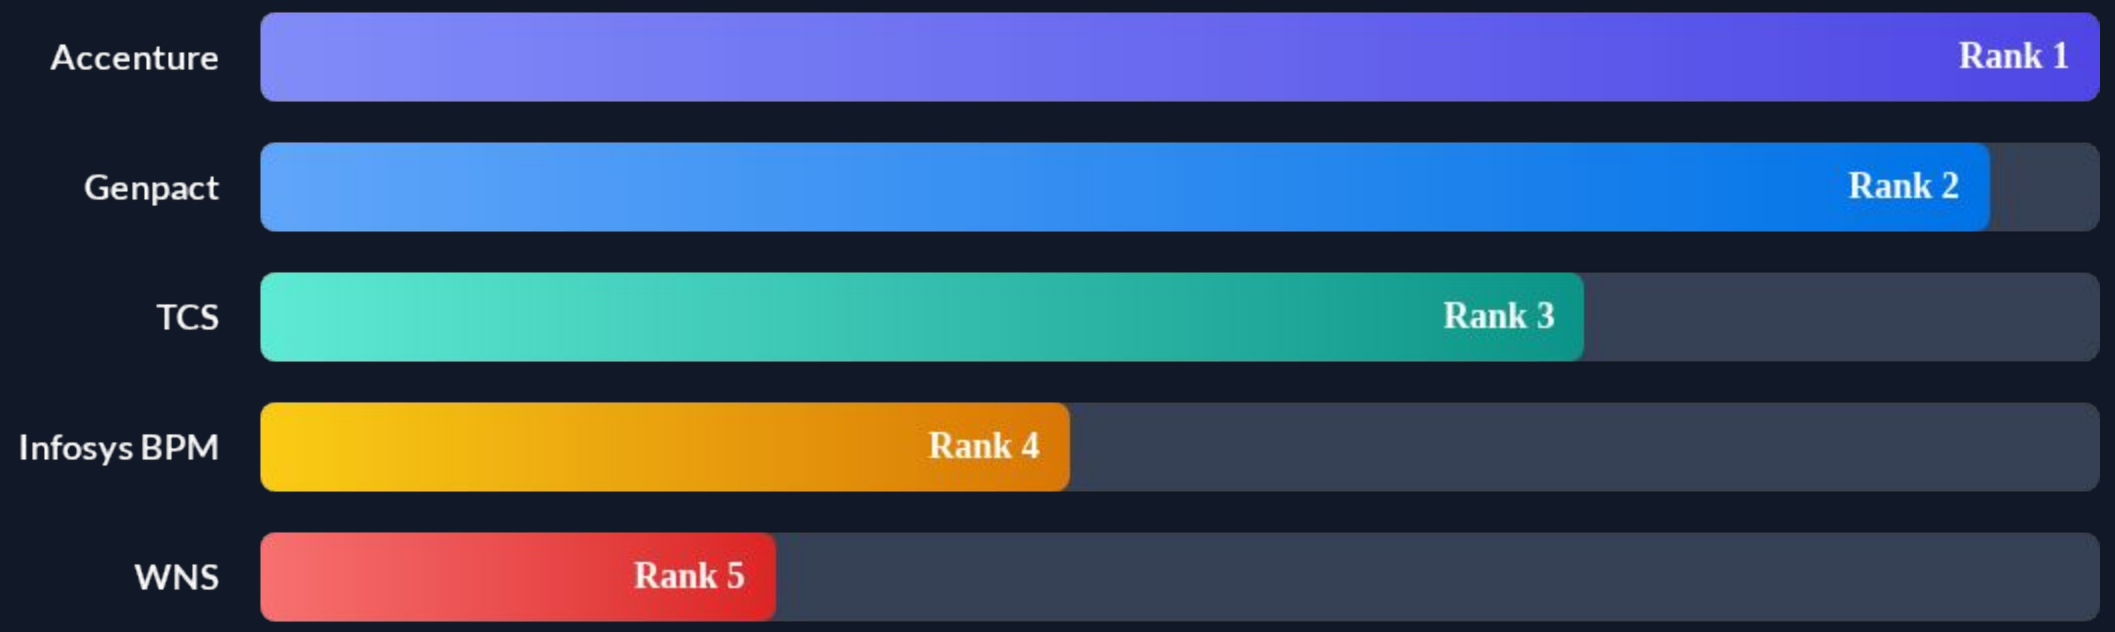
- Genpact is a global professional services and BPM leader founded in 1997 as a GE Capital business unit.
- Headquartered in New York, USA, with major delivery centers in India, the Philippines, and Europe.
- Operates in 30+ countries with 125,000+ employees.
- Core offerings include: Finance & Accounting (F&A), Supply Chain & Procurement, Risk, Compliance & Analytics, Customer Experience (CX), and AI-led Digital Transformation.
- As of 2025, Genpact reported $4.8 billion annual revenue, partnering with 800+ global clients.
- Their proprietary AI platform, Genpact Cora, drives intelligent automation across business processes.

REVENUE MODEL

Genpact generates revenue primarily through multi-year BPM contracts, based on service outcomes and transformation KPIs, not hourly billing.

- Banking, Financial Services & Insurance (BFSI)– 40%
- Consumer Goods, Retail & Manufacturing– 25%
- Healthcare & Life Sciences– 20%
- High-Tech, Media & Others– 15%

MARKET ANALYSIS: BPM SECTOR POSITIONING



Recognized as a **Leader** in the **Everest Group BPS Top 50 (2024)** and **Gartner Magic Quadrant** for Finance and Accounting Outsourcing.

COMPETITOR ANALYSIS

Feature	Accenture	WNS	Genpact
Core Focus	Strategy-to-Execution Consulting	Industry-Specific BPM	**AI, Analytics & Process Operations**
Key Strengths	Scale, innovation, consulting arm	Flexibility, domain depth	**GE heritage, strong Six Sigma, AI platform (Cora)**
AI Platform	SynOps	TRAC	**Cora (AI + Automation)**
Industry Strength	Multi-sector	Travel, Insurance	**BFSI, Manufacturing, Healthcare**
Differentiator	Consulting-led	Domain-led	**AI-driven operational excellence**

CLIENT PERSONAS (1/3)

Anita Sharma (46)

CFO, Manufacturing Enterprise

Bio: Anita oversees global finance operations. Her challenge is controlling costs and maintaining visibility over multi-entity financial processes.

Pain Points: Month-end close takes 10+ days. Manual reconciliations and data errors. No predictive forecasting.

Goals: Automate reconciliations, improve forecast accuracy, and reduce finance cost by 30%.

CLIENT PERSONAS (2/3)

Rahul Verma (40)

VP Supply Chain, FMCG Company

Bio: Rahul manages procurement and logistics across 30 countries. He struggles with delayed shipments, poor visibility, and inefficient vendor management.

Pain Points: No end-to-end supply chain visibility. Reactive rather than predictive planning. High inventory and logistics costs.

Goals: Create a real-time “control tower.” Optimize transportation and procurement spend. Reduce logistics costs by 20%.

CLIENT PERSONAS (3/3)

Maria Lopez (38)

Head of Customer Experience, Banking Sector

Bio: Maria oversees a large contact center. Customer satisfaction is declining due to inconsistent service and slow response times.

Pain Points: Long resolution times. Lack of unified customer view. Reactive complaint handling.

Goals: Achieve 95% First Contact Resolution. Integrate data across channels. Use AI for proactive service.

PAIN POINTS

- **Data Fragmentation:** Finance, supply chain, and CX data exist in silos.
- **Manual, Redundant Processes:** Overreliance on spreadsheets and human approvals.
- **Poor Predictive Insights:** Limited analytics or real-time dashboards.
- **Reactive Operations:** Lack of early warnings for issues.
- **Rising Operational Costs:** Inefficiency in routine transactions.

SOLUTION 1: INTELLIGENT F&A TRANSFORMATION

Pain Points (CFO Anita)

Slow close cycle, manual reporting.

Solution: Cora Finance

Implement Genpact Cora Finance—a unified AI-led platform. Automates reconciliations, journal entries, and reporting. Provides real-time dashboards.

Impact

Month-end close reduced to **3 days**. Forecast accuracy ↑ 25%. Cost per transaction ↓ 40%.

SOLUTION 2: SUPPLY CHAIN CONTROL TOWER

Pain Points (Rahul)

No visibility, high logistics costs.

Solution: Control Tower

Deploy Genpact Control Tower, integrating data from ERP, WMS, and logistics partners. AI predicts risks like delays and suggests alternatives.

Impact

On-Time, In-Full (OTIF) ↑ 20%. Transportation cost ↓ 18%. Inventory turnover improved by 15%.

SOLUTION 3: AI CUSTOMER EXPERIENCE HUB

Pain Points (Maria)

Poor CX consistency, reactive service.

Solution: Cora CX

Genpact Cora CX Platform integrates voice, chat, and CRM data. GenAI assists agents with real-time recommendations and sentiment detection.

Impact

First Contact Resolution (FCR) ↑ 30%. Average Handle Time ↓ 20%. NPS improved by 25%.

SOLUTION 4: HUMAN + DIGITAL WORKFORCE (RPA)

Pain Points

Automation stops at exceptions.

Solution: Cora Integration

Cora integrates bots with human experts. Exception management routed automatically to domain specialists.

Impact

70% straight-through processing. SLA adherence ↑ 40%. 24×7 seamless operations.

FEATURE PRIORITIZATION (RICE FRAMEWORK)

Feature	Reach	Impact	Confidence	Effort	Score
AI Finance Hub	8	9	9	7	92.5
Digital Workforce	10	9	7	9	70.0
Supply Chain Control Tower	7	8	8	7	64.0
CX Hub	9	8	7	8	63.0

**AI Finance Hub* is prioritized due to universal demand and measurable ROI.*

AS-IS FINANCE PROCESS (MANUAL)

Step 1

Data entry and validation done manually.

Step 2

Emails for approvals and reconciliations.

Step 3

Reports prepared in Excel.

Step 4

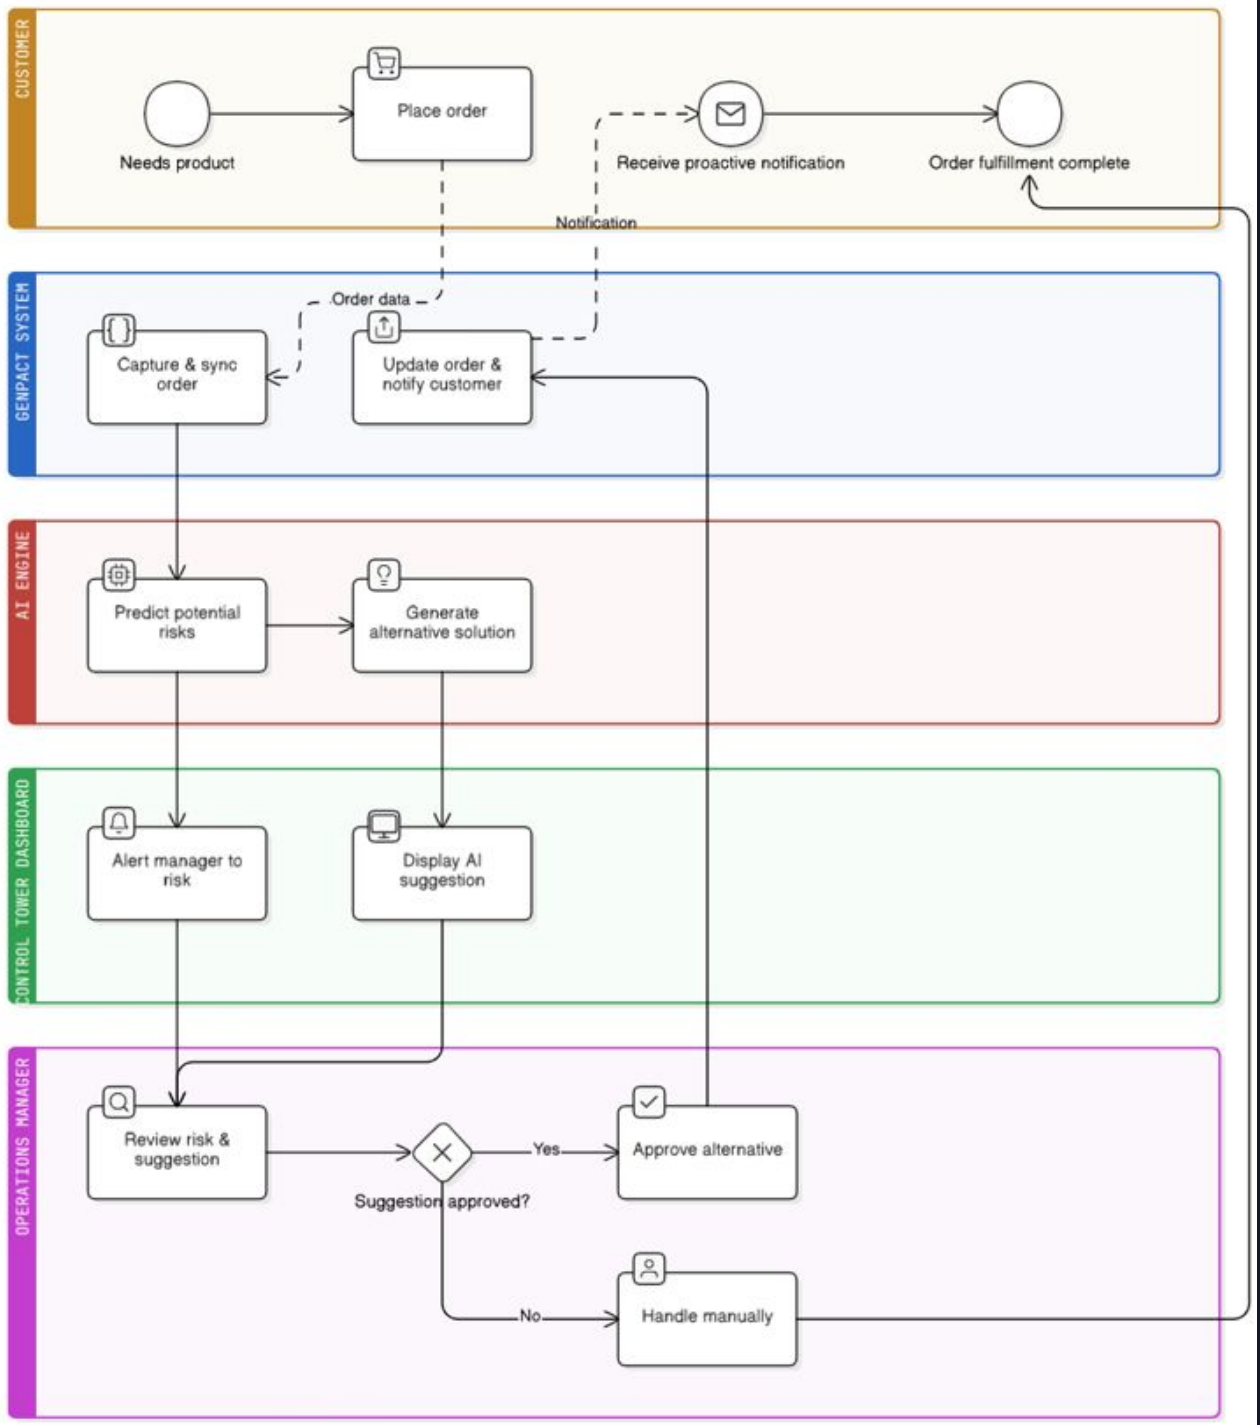
Delayed month-end close and errors.

TO-BE FINANCE PROCESS (DIGITALLY OPTIMIZED)

- **Automated Data Capture:** RPA bots capture and validate data from all sources.
- **Real-time Dashboards:** Managers get immediate visibility into P&L and variances.
- **AI-driven Reconciliation:** Cora AI automatically reconciles accounts and flags only true exceptions.
- **Predictive Analytics:** Forecasting models are run in real-time to predict outcomes.
- **Continuous Improvement:** Genpact Cora monitors process health and suggests further optimizations.

TO-BE SUPPLY CHAIN FLOW

- Orders captured from all channels (EDI, web, manual).
- Data instantly synced across ERP, WMS, and Transport systems.
- AI predicts potential risks (e.g., port delay, stockout).
- Control Tower dashboard alerts the operations manager to the risk.
- Manager reviews AI-suggested alternative (e.g., reroute shipment).
- Customer is notified of the change proactively, in real time.



MEASURING SUCCESS

Solution	Key Metrics
AI Finance Hub	Days to Close ↓ 70%, Forecast Accuracy ↑ 25%, Cost per Transaction ↓ 40%
Control Tower	OTIF ↑ 20%, Inventory Turnover ↑ 15%, Logistics Cost ↓ 18%
CX Hub	NPS ↑ 25%, Handle Time ↓ 20%, FCR ↑ 30%
Digital Workforce	Straight-through Processing ↑ 70%, SLA Adherence ↑ 40%

North Star Metric: Increase in Client's Operating Margin by 15–20%

STRATEGIC INSIGHT

- BPM success requires re-engineering processes, not just automating them.
- Data visibility enables predictive decision-making.
- Blending human expertise with AI ensures resilience.
- Continuous improvement (Kaizen + Lean + Six Sigma) is the Genpact way.

Thank you for viewing this Genpact BPM Teardown.
